How Buttons Work

Setup Instructions Form:
This form explains the operation of
buttons on the Main Menu Form.

Note: This program will only work on computers connected to the Leo A Daly network. For best performance, this program should be located on local (not on the server) computer. Before doing anything else make a backup of this program. In Windows File Explorer simply "Copy" and "Paste" this program file. Always do this before reloading PFD, PRC or Resetting program. You'll be glad you did!

Before running this program, open Project Builder in SEPS and select Project. Click on Reports button and select "Project BIM Export (Excel)".

Note: Inactive (grey) Data Input Form buttons and Room Data Sheet Report buttons indicate that the database is currently empty and Project BIM Export (Excel) spreadsheet data has not been imported.

Import Project Rooms Button: If program has project room data a Question Box will offer the option of cancelling the import. Existing Interior Design data will not be overwritten. Otherwise click on "Yes" and use the browser window to locate the Project BIM Export (Excel) spreadsheet downloaded above and click on "OK".

Import Project Contents Button: If program has project contents data a Question Box will offer the option of cancelling the import. Existing JSN comments will not be overwritten. Otherwise click on "Yes" and use the browser window to locate the Project BIM Export (Excel) spreadsheet downloaded above and click on "OK".

Project Data Form Button: Click on Project Data Form Button to open the Project Data Input Form. Data will appear on page footers and report covers.

PFD Data Input Form Button: Click on the PFD Data Input Form Button to open the PFD Data Input Form. Use the Record Navigation buttons to select and filter records. See "How Buttons Work" form on this page. Only Room Finishes and Room Finish Comments can be edited on this form. All other boxes are locked.

PRC Data Input Form Button: Click on the PRC Data Input Form Button to open the PRC Data Input Form. Use the Record Navigation buttons to select and filter records. See "How Buttons Work" form on this page. Only JSN Comments can be edited on this form. All other boxes are locked. JSN Comments will be applied to all items with the same JSN Number

UFC 4-510-01 Form Button: Click on the UFC 4-510-01 Form Button to open the UFC 4-510-01 Architectural and Engineering Design Requirements Form to edit the "Room Data Sheets Instructions and Key" (probably not necessary).

Room Data Sheet Report Buttons: Use Room Data Sheet Report Buttons to display Room Data Sheet Reports (either brief or full format, with or without Equipment List on back page) on the screen. Room Data Sheet Reports can be saved in .pdf format using the adjacent "Print" button. Use the browser window to specify output folder. If no folder is selected a default folder will be created. Report names include date and time so reports are not overwritten.

Export BIM Spreadsheet Button: Click on Export BIM Spreadsheet Button to export a spreadsheet that will match the Project BIM Export (Excel) spreadsheet including any Interior Design finish changes and any JSN Comments. Use the browser window to specify output folder. If no folder is selected a default folder will be created.

Note: "Reset Program" button requires a double click to activate. This button will delete all data in the program and reset program to "program setup" condition. Always make a backup of the database before activating this feature.

ROOM DATA SHEETS INSTRUCTIONS AND KEY

ARCHITECTURAL AND ENGINEERING DESIGN REQUIREMENTS
FROM UFC 4-510-01 APPENDIX B 18-1217:

B-1 SYNOPSIS.

Appendix B is a compilation of mandatory architectural and engineering design criteria organized by standard Room Codes. The Design and Construction Agent, in conjunction with the Using Agency, may provide additional criteria to meet special needs, e.g., bariatric design, demountable partitions, contingency facilities. The Room Codes used to organize Appendix B are the same as the codes used to organize the PFD and the Equipment List so that the initial design requirements should be well established for the A/E. For Room Codes that are used, but are not included in Table B-1, the room criteria must be obtained from the Using Agency. A period (".") indicates that there is no specific requirement for this parameter or the parameter matches the ambient conditions.

B-2 LEGEND & NOTES.

B-2.1 Room Code.
